### WHY

This protest is organized by #MEAction New York to bring attention to the misinformation that Per Fink is spreading to New York medical providers at the 4<sup>th</sup> Columbia Psychosomatics Conference. Per Fink's unscientific approach to healthcare has been responsible for children and adults being harmed. He believes that certain diseases are psychosomatic (myalgic encephalomyelitis (ME), etc).

**ME is a biological debilitating disease, not a psychologic disorder.**

**We demand that Per Fink stop harming people with unscientific rhetoric and treatments!**
